Summary

This is a quick release for Manfrotto-style tripods that is aligned to the Hadley Tripod Adapter.

[Learning](#) > [Physics & Astronomy](#)

This is a quick release for Manfrotto-style tripods that is aligned to the Hadley Tripod Adapter.

Note that there is a sloped side, I included this to give a tighter fit in the quick release, as having the telescope on the tripod is a little wobbly.

I suggest slicing this with the non-countersunk side on the bottom and with a reasonable infill (I used 50%) for additional strength.
